**01 Stainless steel tapware**  
 Stainless steel is an incredibly durable and corrosion-resistant material. Vola creates beautiful forms from stainless steel, with textures that echo those of the natural world and manufacturing methods that minimize environmental impact.

**04 Responsibly sourced timber**  
 Eco Timber Group is a source of locally manufactured, FSC-certified hardwoods, and it promotes the use of recycled timber and responsible forestry. Its products were used in Baker Boys Beach House by Refresh Design. Photograph: Christopher Frederick Jones.

**02 Sanctuary DC ceiling fan**  
 The Sanctuary DC ceiling fan's wide-reaching blade span and powerful airflow make it ideal for large, open living areas and covered outdoor spaces. Its three sculpted solid timber blades make it a stylish yet commanding feature that supports natural ventilation.

**05 Eres collection by Paola Lenti**  
 Environmental sustainability, ecological balance and renewable materials are each central to Paola Lenti's Eres (meaning "earth") furniture collection, in which linen, hemp, bamboo, raffia, igusa and abacá are the eco-conscious materials of choice.

**03 Climate Active initiative**  
 This opt-in program allows customers to specify and procure any clay brick made in Brickworks' Australian facilities as a certified carbon-neutral product. An audit verified by Energetics enables Brickworks to undertake a lifecycle analysis and purchase carbon credits.
