

Myyour
Soletto

Featuring ample, comfortable cushions, aluminum slats, and a six-position adjustable backrest, the Soletto **garden bed** by Moredesign is crafted from powder-coated aluminum. Curtains on the canopy may be opened and closed for sunlight control and UV protection. The open structure offers a sense of spaciousness and freedom, enabling unobstructed and panoramic views of the surroundings.

Nardi
Maximo

Designed by Raffaello Galiotto, Maximo is a **modular sofa** in which the structure is made of regenerated resin and fabrics. High levels of recycled content in each armchair module allow for countless configurations. Volumes are large, the seating deep and comfortable. The backrest and armrest connection systems ensure flexible and harmonious modularity. The generous, welcoming, self-centering cushions are completed with intricately textured designs.

Neutra
La Grande Muraglia Outdoor

© Leo Torri Studio

Part of Mario Bellini's new outdoor collection, the hallmark feature of this **chaise longue** is its silver travertine structure, making use of natural stone in a deep color and with high porosity, cross-cut to highlight the veins and finished off using with open-pore brushwork technique. The chaise features removable, waterproofed polyurethane padding with a surface finished in resin-coated fiber, a water-repellent polyester liner, and a cushion cover made of 100% recyclable, waterproof polypropylene.

Paola Lenti
Miyabi

© Sergio Chimenti

Francesco Rota's Miyabi **lounge chair** is made of multilayer Aurea Optima heat-treated ash, with plastic end caps. A visible suspension system of intertwined elastic straps uses Rope yarn in a color complementary to the structure. Comfort is enhanced by an additional padded mattress in Aerelle® blue polyester fiber with a fixed Maglia Rasata (knit stitch) cover.
