**DIAMOND – A PENTHOUSE OF SUPERLATIVES**

*Is it a property, or is it art? Perhaps it's a sculpture to live in? Diamond, the penthouse that sits high above Lake Zurich, does not need to provide answers. It sets its very own standards – as a world unto itself. This joyous feeling away from everyday worries manifests itself with every step and every angle.*

*Even from the outside, Diamond seems to be at the very top of its class. Firstly, because the penthouse is located in one of the most exclusive residential areas of Switzerland. Secondly, because it seems to really be floating. Especially at night, when the sea*

*of lights around the lake makes for a dream, Diamond looks like a property from another dimension. Like a shining diamond.*

*The interior design showcases the diamond theme in a particularly ingenious way. A pattern was created, inspired by the cut of a diamond, that is found in all the rooms. Materials have also been specifically made for the property that complete the interior design and make it an unique experience in aesthetics and feel.*

*This property is looking for a purchaser who has an understanding of exclusivity and ex-*

*travagance. Someone who knows how to appreciate maximum privacy, an uncomplicated lifestyle, and would like to enjoy the daily pleasure of owning a real one of a kind property here. If this could be you, then we would be delighted to provide you with more information in a personal discussion. We ask for your understanding that we will not send any electronic documents and will protect the discretion of the seller.*
